

Microsoft Policy

- ✓ A service in Microsoft Azure that allows organizations to define and enforce policies to ensure compliance
- ✓ Centralized and consistent way to govern resources and configurations
- ✓ Critical component of Azure Governance
- ✓ Groups of related policies – initiatives
- ✓ Supports a hierarchy of policy assignment 

Microsoft Policy

Key Features & Functionalities Of Microsoft Policy

Policy Definitions

Policy starts with the definition of policies - The rules and conditions that resources in Azure must be compliant to

Built-In and Custom Policies

Azure provides a set of built-in & custom policies

Scope Assignment

Policies can be assigned at different scopes within Azure, including management groups, subscriptions, and resource groups

Policy Effect

Policies have a defined effect, which can be either "Deny" or "Audit."

Compliance Assessment

Azure Policy continuously assesses resources for compliance with assigned policies

Remediation

Azure Policy can trigger remediation tasks when non-compliance is found

Monitoring and Reporting

Azure Policy provides insights into policy compliance and violations.

Extensibility

Azure Policy is extensible, and it integrates with Azure Security Center, Azure Monitor, and other Azure services
