

Azure Storage Redundancy – GZRS (Geo-Zone Redundant Storage)

Geo-Zone Redundant Storage (GRS)

- ✓ Combines the capability of ZRS & GRS
- ✓ Data is copied across three Azure availability zones in the primary region & also replicated to a secondary geographic region for protection from regional disasters
- ✓ Provides at least 16 nines of durability (99.999999999999999%) over a year ✓
