# Azure Pricing Calculator

Azure Pricing Calculator

✓ Web-based tool provided by Microsoft Azure to help you estimate and understand the costs for provisioning Azure resources.

Azure Pricing Calculator

Key Features & Benefits Of The Azure Pricing Calculator

Resource Selection	Select from a wide range of Azure services and resources
Cost Estimation	Once resources selected, the calculator provides real-time cost estimates
What-If Scenarios	Allows what-if scenarios by adjusting resource configurations and parameters
Cost Breakdown	Provides a detailed breakdown of estimated costs
Save Configurations	Configurations can be saved for future reference or sharing with team members
Export Capabilities	Cost estimates can be exported in various formats, such as CSV or PDF
Integration with Azure Accounts	sign in with their Azure accounts to estimate costs for existing resources
Currency and Region Selection	Allows to select multiple currencies and regions
Documentation and Guidance	links to Azure documentation to understand Azure services and resources
Continuous Updates	Updated regularly to reflect the latest Azure pricing and service offerings
Cost Saving Options	Provides options to explore cost-saving measures
